

The Honors College at the University of Maine

TIAA 2018–19 Distinguished Honors Graduate Lecture

Isaac Record

Life, the University and Everything:
My Romp Across Disciplines in Pursuit of Answers

Tuesday, Sept. 25, 2018 • 3:30 p.m. • Hauck Auditorium

Isaac Record '03 is an assistant professor of practice in Michigan State University's Lyman Briggs College, where he directs the Collaborative Experiential Learning Laboratory (CELL) and teaches courses in philosophy of science, science and technology studies, and critical making. His research seeks to situate our epistemic and ethical circumstances within a network of values, capabilities, and material and social technologies. Record's UMaine Honors class of 2003 was the first to graduate after the Honors Program transitioned to an Honors College. He earned dual bachelor's degrees in electrical engineering and computer engineering. Record holds a Ph.D. and a master's degree from the Institute for the History and Philosophy of Science and Technology at the University of Toronto.

We are pleased to acknowledge the continuing collaboration between TIAA and the Honors College to present the UMaine Distinguished Honors Graduate Lecture. Each year, the series gives us an opportunity to highlight the accomplishments and vision of an Honors graduate, and his or her connection with the Honors College and the university. We also thank the following co-sponsors: College of Engineering • Office of the Vice President for Research & EPIC • Department of Philosophy • Department of Electrical and Computer Engineering • ASAP • Center for Innovation in Teaching and Learning • Hackerspace • IMRC • Clement and Linda McGillicuddy Humanities Center • Foster Center for Student Innovation
